

IT Staffing Success Story

Nowadays, global corporates takes **IT staffing solutions** to enhance their IT current team through specialized consultants for every industries different needs, with the main benefit of reducing operating costs and increasing the quality of service.

At **Proceti**, we have the focus, methodology, personnel, knowledge and experience to carry out your initiatives, so that the investment that is channeled in our projects, ensures the fulfillment of the objectives and the expected results are achieved.

BARS FOODS' SUCCESS STORY

BARs Foods is a global food company dedicated to bringing food to communities in 18 countries world wide. The company was looking to incorporate control measures to ensure the optimal conditions of its freight, including preventive and corrective maintenance to keep their equipment in good conditions.

PROCETI'S ADDED VALUE

We made different process analysis through the development of the SAP PM module.

- We worked directly with the plant general manager and the freight chief.
- Documentation of the information gathering (BBP's), process diagrams, configuration and master data lay outs; for the comprehensive tests to be done and satisfactorily accomplish them.
- With our adequate implementation, it was possible to manage the planning, processing and completion of tasks for the maintenance of the plant, leading to making the best decisions and at the same time avoiding possible breakdowns, obtaining data to obtain spare parts, preparing a maintenance plan, knowing the load actual work and collect process information to obtain savings in waiting times for labor and machinery maintenance.

Raising the bar.
